

Custom Drains

PRODUCT DATA SPECIFICATIONS

PRODUCT DESCRIPTION

One of OMG's specialties is the design and fabrication of custom drains. Though most new and retrofit roof drain installations conform to standard industry practices, there are the occasions when an unusual condition occurs at a drain location. In such instances, the standard drain may need to be modified or custom designed to fit the particular site conditions.

FEATURES & BENEFITS

- Choose your stem diameter, length and angle.
- Choose your flange size.
- Specify the position of the hole, whether centered or off-center.
- Choose from a variety of strainer options.
- Clamping rings or heat weldable flanges available.

Custom designed drains in any quantity!

APPLICATION

OlyFlow® RetroDrains are designed to replace existing drains in reroofing applications. Installed from the roof surface, OlyFlow RetroDrains are engineered to be installed without removing the existing plumbing or fixture while providing a watertight connection to the roof system and the existing plumbing.

SUBMITTALS

If you have a special application, or would like a custom design drain, please give us a call at 800-633-3800 or download the Custom Drain Submittal Form available on page 2 of this document.

CONDITIONS OF SALE

While we recognize the potential for error in field measurements and drawings, it is imperative that custom requests and drawings are confirmed for accuracy to avoid the following conditions of sale;

1. Because custom-made products are designed to work in a specific scenario we will not accept returns for any reason.
2. If, for any reason, an order is cancelled the customer will be responsible for all costs incurred by OMG including engineering charges, material purchased and labor, plus 10% of the quoted price.
